Acquisition of Lottery System Provider—Bestinfo

China LotSynergy Holdings Limited (the “Company”) is pleased to announce that Beijing Kexun Tiandi Technology Co.,Ltd (“Kexun”), a wholly-owned subsidiary of the Group, has today completed the full acquisition of Beijing Bestinfo Cyber Technology Co.,Ltd (“Bestinfo”). Bestinfo is now a wholly-owned subsidiary of the Group.

Bestinfo has a long-term commitment to providing corporate clients with specialized IT services, including integrated corporate data centre architecture and corporate software application solutions. The company offers all-encompassing lottery industry solutions, with capabilities in lottery transaction systems, data mining and analyses systems (management information systems), data storage and backup, along with data encryption and system integration implementation. In specialized technology services, Bestinfo has established a system integration, technical support and software research and development team, with technical expertise in lottery industry specific software applications, databases, networks and storage. In project management, Bestinfo has extensive experience in system integration, software development and maintenance. The company was also the recipient of the National Science and Technology Progress Award, along with other related ministerial science and technology awards.

Bestinfo’s team specializes in the research and development of lottery transaction and management systems, and is responsible for a number of firsts in the Chinese lottery sales systems market, including: establishing the first computer ticket

game (“CTG”) hotline system in Dongguan, Guangdong Province and the first hotline CTG sales system in China, which was implemented in Zhejiang Province; as well as developing the first nationwide standard version of the provincial CTG sales and management system under the commission of China Welfare Lottery Administration Centre, which has successively operated in the provinces of Guangdong, Shanxi and Fujian. Currently, Bestinfo is the Welfare CTG hotline sales system (including the construction of a central data processing system, maintenance and technical services) provider for Guangdong Welfare Lottery Centre, which is Welfare Lottery’s largest provincial lottery authority by sales, as well as the provider for Shanghai Welfare Lottery Centre’s “New Sales and Management System Technical Services Project”.

Prior to the acquisition, Bestinfo had established a technical services collaboration with the Group’s subsidiary, Guangzhou San Huan Yong Xin Technology Company Limited (“San Huan Company”), in a relationship which has spanned over 10 years. The two companies jointly provide CTG hotline sales system services, lottery terminals and other related services to Guangdong Province Welfare Lottery Centre, which oversees China’s largest provincial Welfare CTG market in terms of terminal installed base and sales. The two companies have won broad acclaim from lottery authorities and lottery points of sale, and enjoy an incident-free track record, setting the benchmark for collaborations within the industry.

The Group believes that this acquisition will further enhance its capabilities in lottery system technology and strengthen its position as a leader in lottery sales systems and terminal services, facilitating the consolidation of its presence at all

levels of the lottery value chain.
