Success in the bid for the procurement of sports lottery CTG terminals in Guizhou Province marks CLS's formal entry into Sports Lottery terminal market in China

CLS is pleased to announce that Lottnal, a subsidiary of the CLS Group, has won the bid for the procurement of lottery terminals for Guizhou Provincial Sports Lottery Administration Center, according to the notification of award from Guizhou Province Tendering Company Limited dated 22 July 2013. This is the first winning bid after Lottnal was approved as a provider of CTG terminals for China Sports Lottery Administration Center on 15 March, and marks CLS's formal entry into the Sports Lottery terminal market in China.

Lottnal will provide its Standard Type KT301 terminals, which comes with brand new shell-shape structure, high-performance host, and multiple display outputs. This model is favored by the customer due to its high-performance, compact structure and ease of maintenance. As a newly approved terminal supplier for Sports Lottery and in the circumstances that very little about Lottnal was known to the lottery authority, Lottnal's success in this bid in only three months' time proves that its comprehensive strength including its advanced products, technology and quality services have been well recognized in the country's Sports Lottery market.

Lottnal is currently making preparations to ensure the effective and efficient delivery of the terminals including installation and after-sale services, according to the requirements of the tendering documents and Guizhou Sports Lottery Center. Lottnal will seek to seize the opportunities in all provinces brought by the surge in the demand for replacement as well as new addition of terminals in the next terminal replacement cycle in Sports Lottery. With Lottnal's competitive advantages in product and services, CLS will endeavor to expand its market share in the CTG terminal market.
